

# SUPERFLEX PLASTIC SKIMMING TROWELS

## PLASTIC SKIMMING TROWELS

- plastic faced trowels
- for multi finish & skimming
- white cements & renders
- non marking on epoxies
- special finishes on render

These new Superflex Plastic Skimming Trowels are for finishing large areas trowelling up topcoat plasters and internal coatings

They are lightweight and easy to use leaving an excellent finish after sponging up

They are also used to achieve special finishes with external renders, the plastic blade gives a different finish to steel trowelling

The trowel body has a stainless steel blade with alloy shank and soft handle; it slots into the plastic blade holder bracket on the flexible plastic blade

The longer trowels have a foam stiffening pad that ensures flexibility along the blade

The blade is easily replaced and changed for a different size

The trowel can be used on decorative finishes and epoxy quartz
