

COVE & SCREED TROWELS

COVE & EDGING TROWELS

- stainless steel corner & cove trowels
- range of radius sizes
- for use on epoxy screed coves
- edging slabs & stairs
- produced by Refina in the UK

These corner, cove and edging trowels are all produced in stainless steel and have traditional wooden handles

The cove trowels are for producing smooth corners particularly in hygienic environments; the mitred corner cove trowels are for making consistent corner coves

These floor & screed trowels are produced with a double hang shank and handle for a firm trowel where more weight can be applied to the heel

The long narrow shaped trowels are for finishing epoxy & latex; the heavier duty "Big Ben" trowels are produced from a heavy gauge rust free stainless steel and are for use on sand and cement screeds
