

BLOCK CUTTERS

- heavy duty portable splitters & cutters
- for pavers & concrete slabs
- blocks & brick
- tiles & stone

The block cutters have three preset blade heights and fine screw adjustment

The equipment is heavy duty and site robust

The block tongs are used for lifting and repositioning blocks and pavers and are adjustable for different block sizes

The crowbar has a hardened front chisel end and is for loosening blocks and slabs

The mallet has replaceable rubber faces and is for tamping

The tile cutters are produced with solid alloy bases, bushed handle runners and heavy duty breaker bars

The rotary cutter wheel is produced in solid tungsten carbide for easy and precise cutting

The cutting wheel is easily changed

The tile cutters will handle the full range of wall and floor tiles
