

PLASTER & CEMENT TROWELS

PLASTERCRAFT TROWELS

- chrome stainless steel trowels, rust free
- sizes from 11" to 18"
- fully riveted
- guaranteed one year for trade use
- produced with soft handle
- or shaped wooden handle

PLASTERCRAFT trowels are a range of premium quality trowels produced for trade use on plaster and cement

The trowels are fully riveted, slightly narrower and more rigid than the wider plaster trowels

They are made from the finest chrome stainless steel for rust free use, tempered and cross ground. The trowel edges have been mechanically finished and rounded so as they do not have to be broken in on sand and cement

The trowels are produced with a composite rubber soft handle. The soft handle is easier to grip and reduces muscle and joint strain. The soft handles are not resistant to epoxy solvents

The premium trowels are guaranteed one year for normal trade use
