

PLASTER & ARTEX BRUSHES

BRUSHES FOR ARTEX

- rubber stipplers for textured ceilings
- for producing swirls & patterns

These stipple brushes are made with rubber fingers and are for producing swirl finishes, patterns and textures

The large stipple brush is for use with a wooden handle
The water brushes are produced from pure mixed bristle and are used by plasterers for wetting down before final sponging or trowelling

The rounded jointer is produced from hard wearing flexible rubber and is used for finishing rounded corners and coves. It can be used with a wooden handle for ceiling work
