

THREADED MIXER PADDLES

EPIMIXER THREADED PADDLES

- trade quality technically designed paddles
- generate a thorough mix action
- threaded shaft to fit directly into mixer drill
- largest range of designs & sizes
- guaranteed German made quality

Threaded EPI mixer paddles fit directly into the front end M14 thread of the mixer drill

The paddles are of proven design to give efficient mix action; they are produced to ensure a perfectly balanced shape that eliminates paddle wobble

MR3 paddles are the most popular design for a wide range of bagged materials, plaster, cements, resins, coatings, wet and pourable mixes. The mix action is thorough and consistent; the paddle floats in the mix making handling easy

The MR3 paddles develop a top to bottom mix action; the MR3R paddles are the same design but with a right hand spiral and bottom to top mix action

APPLICATIONS

- mix liquids & powders
- plasters & textures
- renders & lime mortars
- paints & coatings
- cements & mortars
- resins & epoxies
- latex & screed
- tile cements & adhesives

081502	MR8 150G 6" paddle	700 watt	150mm	600mm	30-100 ltr	35.00

GATE PADDLES, for mixing finish plasters, coatings and light powders

Stock no	Description	Drill size	Paddle Ø	Length	Mix	£ ex VAT
011102	gate 8" paddle	1000 watt	200mm	600mm	50-200 ltr	40.00

PADDLE CONNECTORS

QUICK CHANGE PADDLE CONNECTOR

- two part connector
- fits all Megamixers & M14 threaded paddles
- allows easy removal of paddle after work
- quick change of paddle shape or size
- no tools needed for paddle change
- order extra adaptors for secondary paddles
- guaranteed German made quality

The new quick change connector is a two part fitting with the connector body attached to the power mixer output and the adaptor tail piece attached to the M14 paddle thread

Most mixer drills are fitted with an M14 output or connector to accept M14 threaded paddles

Connectors are for fitting threaded paddles to electric, air or petrol powered drills

Paddle extensions extend the overall paddle length; they are for use by taller users or for mixing in a 45 gallon drum

The chuck with M14 male adaptor allows hex shaft paddles to be used with a MEGAMIXER. Several smaller paddles are only available with a hex shaft

Stock no	Description	Connector	£ ex VAT
000110	300mm paddle extension	M14 male to M14 female	18.00
000114	450mm paddle extension	M14 male to M14 female	28.00

MIXER PADDLES HEX SHAFT

EPI-MIXER HEX SHAFT PADDLES

- hex shaft paddles for drills with chuck
- large range of shapes & sizes
- long life and durable mixer paddles
- for plaster, mortars, paints & resins
- made in Germany guaranteed quality

EPI mixer paddles with hex shaft are for use with drills fitted with a drill chuck

Use with slow to medium speed drills under 1000rpm

The larger the paddle, the slower speed at which the drill should be run

The advantage of using a drill with a chuck for mixing is that a variety of paddles can be quickly fitted

Many smaller paddles are only available with a hex shaft
