

# PIN & NOTCHED LEVELLERS

## PIN & SKID LEVELLERS

- adjustable height coating & topping gaugers
- aluminium frame & stainless steel blades
- with stainless steel hardened pins
- or adjustable end skids
- material depth adjustable from 1-20mm
- for epoxy coatings & latex
- pumped screeds & self-levellers
- produced by Refina in the UK

The pin and skid levellers are produced from heavy gauge aluminium and have a slotted stainless steel blade for setting various material depths

The pin leveller uses a set of hardened pins with an adjustable stainless steel plate to gauge and level floor toppings and coatings

The pins will wear down with regular use and the pin bar is easily replaceable

The depth is fully adjustable from 1mm to 20mm

The skid leveller has the same adjustable depth stainless steel blade but also two end skids. It is more suitable working on rough and uneven floors

The depth is fully adjustable from 10mm to 30mm

The notched levellers are used for pulling out floor surfaces to a precise depth and for putting down scratch coats

Any of the notched blades can be fitted to the leveller
