

PLASTIC TROWELS

PLASTIC TROWELS

- plastic faced trowels
- range of different plastic trowel blades
- for white cements & renders
- non marking on epoxies
- special finishes on render

Plastic trowels are used mainly to avoid surface discolouration and blade transference from steel trowels

They are also used to achieve special finishes with external renders, the plastic blade gives a different finish to steel trowelling

The trowel with alloy shank is supplied with flexible clear blade for white cements or stiffer grey blade for epoxies

The trowel with orange plastic handle has a nylon blade that is solvent resistant and can be used on decorative finishes and epoxy quartz

The range of trowels with black soft handles are for external render finishes and interior decorative coatings

Other plastic trowel blades are available for differing surface finishes
