

SCREW SPRAY RENDER PUMP

HANDYJET SCREW PUMP 3 PHASE

- hopper feed screw pump
- for spraying & applying
- plasters & coatings
- textures & high build masonry coatings
- fireproofing paints

This screw pump is a hopper feed unit designed to spray pumpable external renders and heavy coatings. The pump requires a three phase 415 volt electrical supply and has interchangeable rotors and rubber stators to pump and spray apply heavy bodied cement and plaster based finishes.

The material is mixed directly over the hopper using the piggyback RMX100 mortar mixer and discharged into the pump hopper and then pumped to the spray gun for application.

The standard motor supplied is 415 volt three phase. The pump is available with a range of different rotor-stators setups with outputs from 15 to 25 ltr/min.

The full system includes the 2.2kw screw pump, 1.5kw piggyback mixer and air compressor.

A generator is required to power the spray pump and mixer.

APPLICATIONS

- colour through & polymer renders
- fire proofers & intumescent paints
- projection & spray plasters
- high build exterior build coatings
- floor toppings & finishes
- heavy bodied coatings
- waterproofing & tanking coatings
- grouts & pointing mortars

Handyjet Screw Spray Pump 3.0kw 415 volt

Machine weight 94kg

Size WxL 50x135cm

Height 65cm

Hopper tank 60 ltr

Pump output 25 ltr/min

Noise level 59dBA

Generator 8kw 3 phase

Compressor required 1.5kw
