

SKIMMING SPATULAS

- super flexible stainless steel
- rounded edges & tapered blade
- h frame moulded handle
- for finishing & smoothing
- walls & ceilings
- plasters & special finishes

The spatulas are produced with an ultra flexible stainless steel blade and h frame moulded hand grip. They are used in conjunction with sponge floats to finish plaster surfaces.

The smaller skimming spatulas are used for jointing, taping and smoothing.

The larger skimming spatulas are for finishing large areas and ceilings.
